Chapter 1

Introduction.

Computer Tower

Computer System

Personal Computer

The P.C (Personal Computer) allows many tasks to be undertaken, which would otherwise not be possible.

From typing a letter, to surfing the net, the computers versatility has meant many homes and workplaces rely on the computer for everyday tasks.

This book delves into the mysterious world of how the computer actually works, inside those boxes.

Computer Hardware

Although understanding the precise operation of computer hardware requires detailed technical knowledge, understanding the basics of how a computer works does not.

**Computer System**

The computer system comprises of several boxes.

The main computer is housed in a tower.

Motherboard

Inside the tower is the motherboard and drives.

The drives connect to the motherboard through special ribbon cable.

The cable contains many separate wires moulded into a flat wide cable.

Tower

Hard Drive

Motherboard

Monitor

Tower

Monitor

The monitor is housed in a separate box, this plugs into the main system tower.

CRT

Today's slim line monitors are a far cry from the old large cumbersome, cathode ray tube (CRT) monitors.
